EARTHLY DELIGHTS

Artist **Paula Hayes** joins natural and sculptural forms in her otherworldly creations. Here, she creates a miniature birdbath—providing a respite for humans and animals alike—exclusively for *Cultured*.

Mini Birdbath in Quince, 2018, \$6,400, cast resin in high-gloss polished acrylic. It is an edition of three made exclusively for *Cultured*.

“I made this tiny translucent form to be set in a garden space, either inside or outside, in a place where small birds can bathe in the small amount of water that can be poured into the top dish shape. The form can also be given a blossom to float in the water. I made it as a reminder of devotion and taking that moment to care about the birds and flowers, to slow down for a minute and do something beautiful.” —Paula Hayes
